三、阅读理解

(难度度:中)

24. 阅读理解：阅读下面的对话，根据对话内容进行判断，正确为“T”，错误为“F”。

Henry and his friend Sally are talking about online shopping.

Sally: Do you do a lot of your shopping online?

Henry: Not really. I like looking at what's available on the Internet before I actually buy it. Sometimes, I'll choose what I want in a shop, later buying it online if it's cheaper. You don't like buying things online, do you?

Sally: No. I'm a little worried about security issues. You never know who's trying to find out your codes and passwords. Aren't you worried about that?

Henry: Not really. I know that it happens, but if you buy from reputable companies with secure websites, it should be OK. Even though I use online shopping facilities, I don't think it's the best way.

Sally: I'm surprised to hear you say that. I thought you loved any digital things.

Henry: I do. I'm a big fan of using new digital products, but I don't want to sit in front of a computer screen all day. I think people need to get out and interact with other people.

Sally: So, how about coming to the department store with me? I want to see if there are any new summer clothes on sale yet.

Henry: Sure. I'd love to join you. Can we stop by the computer store? I just want to see if they have something.

Sally: Sure. While you're in the computer store, I will visit the book store opposite. I like to browse through their books if they have anything interesting.

Henry: OK. I've finished online. Let's go. I'll just get some money and my credit card.

Sally: Thanks for reminding me. I had forgotten to get mine.

Both of them like online shopping very much. 1

2. Being cheap is one of the reasons for online shopping. 2

3. Henry is a big fan of digital products, so he likes sitting in front of the computer all day. 3

4. Henry will go to the department store with Sally. 4

5. Both of them will visit the computer store. 5

25. 阅读理解：阅读下面的短文，根据文章内容从A、B、C三个选项中选出一个最佳选项。

Forces other than damaging winds are also at work inside tornadoes(龙卷风). Sometimes, as the wind passes a house, the walls and ceiling burst apart as if a bomb had gone off inside. This explosion is caused by the low air pressure at the center of a tornado. The pressure at the center of a tornado is usually 13 pounds per square inch. However, inside the house the air pressure is normal, about 15 pounds per square inch. The difference of 2 pounds per square inch between the inside and outside pressure may not seem like much. But suppose a tornado passes over a small building that measures 20 by 10 by 10 feet. On each square inch of the building, there is 2 pounds of pressure from the inside that is not balanced by air pressure outside the building. On the ceiling, that adds up to an unbalanced pressure of 57,600 pounds. The pressure of the four walls adds up to 172,800 pounds. If windows are open in the building, some of the inside air will rush out through them. This will balance the pressure inside and outside the building. But if the windows are shut tightly, the huge inside pressure may cause the building to burst. Unfortunately, heavy rain often occurs in the storms that later produce tornadoes, so people often shut their windows. This may cause far worse damage later.

What did the paragraph before this passage most probably discuss? 1

A. Measuring rainfall from a storm.

B. The kinds of damage caused by explosions.

C. The powerful winds of tornadoes.

2. Which of the following is the main topic of the passage? 2

A. How tornadoes can be prevented.

B. When tornadoes usually occur.

C. Why tornadoes cause so much damage.

3. Tornadoes can destroy buildings because the_____. 3

A. force of a tornado increases the air pressure in a building

B. air pressure inside a tornado is less than the air pressure inside a building

C. air pressure at the center of a tornado is over 172,000 pounds

4. What is the difference per square inch between the air pressure inside a building and the air pressure inside a tornado? 4

A. 2 pounds. B. 13 pounds. C. 15 pounds.

5. What would happen if the windows are shut tightly in the stormy weather? 5

A. Tornadoes may be formed.

B. The house may burst apart.

C. There may not be any pressure inside the building.
